

Belmont Fabrications provides high specification pharmaceutical process assemblies and bespoke equipment as well as high-end architectural metalwork and value steel fabrication to many industries.

At Belmont we advise, fabricate, and can install the highest quality work to our customer's specifications adopting a hands-on can-do attitude.

We are a friendly and professional company, based in Newbury, Berkshire, employing highly skilled craftsmen with a vast collective range of experience in producing "almost anything" in a range of metals utilizing our talents in fabrication, welding, polishing & sheet metalwork.

With over 35 years experience we have developed considerable know how and experience in the following areas:

- Stainless steel fabrication
- Pharmaceutical sector fabrications and bespoke assemblies
- Architectural metalwork
- Pressure vessels
- Specialist processing plant
- Food sector plant
- Structural steelwork to BS EN 1090
- Brewery plant & pipework

We have a reputation for building close working relationships with our customers and frequently advise our clients on their projects right from the initial concept stage through to final production. This enables our customers to receive the most cost effective designed solutions for manufacture.

More than just a fabrication company our expertise allows us to project manage the work for you enabling you to outsource the most demanding work and fabrication requirements particularly where you need to rely on flexible competitive partner providing quality at the right price and at the right time.

Belmonts have a thorough knowledge of current Good Manufacturing Practice with our unwavering attention to detail coupled with our ability to provide the necessary audit trail and certification complimented by our understanding of CE marking and ATEX

We have built a strong reputation for being customer focused and providing a first class fabrication service – exactly how you want it. No fuss, no jargon, just solutions

Belmont Fabrications are the people to talk to first.....
